

Trip to the Ellis Clark Agriscience Program at Nonnewaug High School is a Day of Wonder for Region 14 Kindergarten Students

May 17, 2023 – Kindergarteners from Bethlehem and Mitchell Elementary Schools had a special visit to Nonnewaug High School recently to see the many facets of the Ellis Clark Agriscience Program.

The kindergarteners were greeted by smiling Agriscience student tour guides who introduced them to various parts of the program. They saw the livestock in the large barns, rabbits, and other small animals in the small animal area, met “Sugar” the pony in the horse barn, toured the aqua greenhouses to see aquaculture and aquaponics in action, got to sit on the various farm tractors, plant a vegetable in floriculture, and learn about the taxidermy animals in the natural resources area.
