

Nonnewaug High School Drama Club Presents “Clue”

Was it Mrs. White? Could it have been Mrs. Peacock? What about Colonel Mustard? The Nonnewaug High School Drama Department will present the hilarious whodunnit and where one-act performance of “Clue” on December 8 and 9 and students are excited to bring a modern twist to this classic murder mystery favorite.

The cast and crew of 20 students have been rehearsing since September under the direction of new Drama Advisor Catherine Pelkey. With costumes ready and sound and lighting being tweaked, members of the Drama Club are ready for the curtain to go up Thursday for an entertaining evening of murder and mayhem.

“It’s a very funny, kind of dark humor play,” said Michaela Pellino, who plays the somewhat batty and eccentric

churchgoing wife of a senator “Mrs. Peacock”. “There is a lot of fun to it and some surprising plot twists.”

The play is an adaptation from the 1985 movie that was based on the iconic board game from the 1940s. The high school stage play is the adaptation of the movie and there are several board game references students say will make their parents chuckle.

“They are going to love those,” said junior Campbell Bologna, who plays Professor Plum.

Junior Ruby Lombardi, who plays French Maid “Yvette” said the play has some fast-paced fun for all. “I think the audience will really like the characters,” Lombardi said. “There is some classic humor aimed at the adults and some really funny lines that will make everyone laugh.”

Cast members also include Nicole Dionne as “Wadsworth”, Talan Wilkas as “Miss Scarlett,” Polina Mylos as “Mrs. White,” Enzo Pamplona as

“Colonel Mustard”, June Robinson as “Mr. Green”, and Gabriella Fernandes as “Mr. Boddy.” The ensemble cast includes Hannah Ringeisen, Kayleigh Gringas, Elliot Lizak, and Timnah Kaufman along with a hardworking stage and set crew working behind the scenes.

“We are all really excited to present this play,” Pelkey said.

Tickets are \$10 for adults and \$5 for students and can be purchased by scanning the QR code on the flyer or at the door.
