### **Administering Medication**

#### **Opioid Overdose Prevention (Emergency Administration of Naloxone)**

The Board of Education (Board) recognizes that many factors, including the use and misuse of prescription painkillers, can lead to the dependence on and addiction to opioids, and that such dependence and addiction can lead to overdose and death among the general public, including District students and staff. The Board wants to minimize these deaths by the use of opioid overdose prevention measures.

The Board of Education (Board) is committed to enhancing the health and safety of individuals within the school environment. The District will identify specific locations for the storage of Naloxone and protocols for its administration in emergency situations to assist individuals suspected to be experiencing an opioid overdose.

### **Definitions**

**Drug overdose** means an acute medical condition, including, but not limited to, severe physical illness, coma, mania, hysteria or death, which is the result of consumption or use of one or more controlled substances causing an adverse reaction. The signs of opioid overdose include unresponsiveness; nonconsciousness; shallow breathing with rate less than 10 breaths per minute or not breathing at all; blue or gray face, especially fingernails and lips; and loud, uneven snoring or gurgling noises.

**Naloxone (Narcan)** means a medication that can reverse an overdose caused by an opioid drug. As a narcotic antagonist, Naloxone displaces opiates from receptor sites in the brain and reverses respiratory depression that usually is the cause of overdose deaths.

**Opioid** means illegal drugs such as heroin, as well as prescription medications used to treat pain such as morphine, codeine, methadone, oxycodone (OxyContin, Percodan, Percocet), hydrocodone (Vicodin), fentanyl, hydromorphone (Dilaudid), and buprenorphine.

### **Delegation of Responsibility**

The Superintendent or his/her designee, in consultation with the school nurse(s) and the school physician/School Medical Advisor shall establish appropriate internal procedures for the acquisition, stocking and administration of Naloxone (Narcan) and related emergency response procedures pursuant to this policy.

The school physician/School Medical Advisor shall be the prescribing and supervising medical professional for the District's stocking and use of Naloxone (Narcan). The Superintendent or his/her designee shall obtain a standing order from the school physician/School Medical Advisor for the administration of Naloxone (Narcan).

### **Administering Medication**

#### **Opioid Overdose Prevention (Emergency Administration of Naloxone)**

##### **Delegation of Responsibility** (continued)

The standing order shall be maintained in the Superintendent's office and copies of the standing order shall be kept in each location where Naloxone is stored.

The school nurse shall be responsible for building-level administration and management of Naloxone and management of Naloxone stocks. Each school nurse and any other individual(s) authorized by the Superintendent shall be trained in the administration of Naloxone.

Naloxone shall be safely stored in the school nurse's office or other location designated by the school nurse in accordance with the drug manufacturer's instructions.

The Board directs the school physician/School Medical Advisor to issue a non-patient specific order to District school nurses to administer (*select as per the medical order: intranasal or intramuscular*) Naloxone (also known as Narcan, among other names) for the purpose of emergency first aid to students or staff who do not have a prior written order from a qualified medical professional for the administration of Naloxone. The non-patient specific order shall include a written protocol containing the elements required by the regulations of the Department of Consumer Protection.

The Board permits school nurses to administer Naloxone to any person at school or a school event displaying symptoms of an opioid overdose. The District will store the Naloxone kits in a secure but accessible location consistent with the district's emergency response plan, such as the nurse's office. Naloxone shall be accessible during school hours and during on-site school-sponsored activities.

### **Acquisition, Storage and Disposal**

Naloxone shall be safely stored in the school nurse's office or other location designated by the school nurse in accordance with the drug manufacturer's instructions.

The school nurse shall obtain sufficient supplies of Naloxone pursuant to the standing order in the same manner as other medical supplies acquired for the school health program. The school nurse or designee shall regularly inventory and refresh Naloxone stocks, and maintain records thereof. In accordance with internal procedures, manufacturer's recommendations and any applicable Department of Public Health guidelines.
