August 29, 2018

Dear Region 14 Community,

I wanted to take a moment to clarify that it remains our intention to begin school for students on Thursday, September 6. I know that there are many rumors circulating that due to the high school construction project that the opening will be delayed.

There have been challenges this summer, excessive heat and torrential rain, yet the work continued and progress is being made day by day. I honestly do not know how the workers on projects such as this endure the extreme conditions and I certainly thank them for returning every day.

This morning I took a walk through the high school building and met with many of the lead people on the project. They have assured the high school principal and me that we will be ready.

Great things are happening and we will have an outstanding high school facility at its final completion. This year our teachers, staff and students will continue to learn in an environment that is ever changing and may not be picture perfect at every moment. We appreciate your patience while we undergo renovations.

We look forward to welcoming all of our students back to school on Thursday, September 6.

Respectfully,

Christine Syriac
Interim Superintendent of Schools
